

# MySQL Patient Activation Code

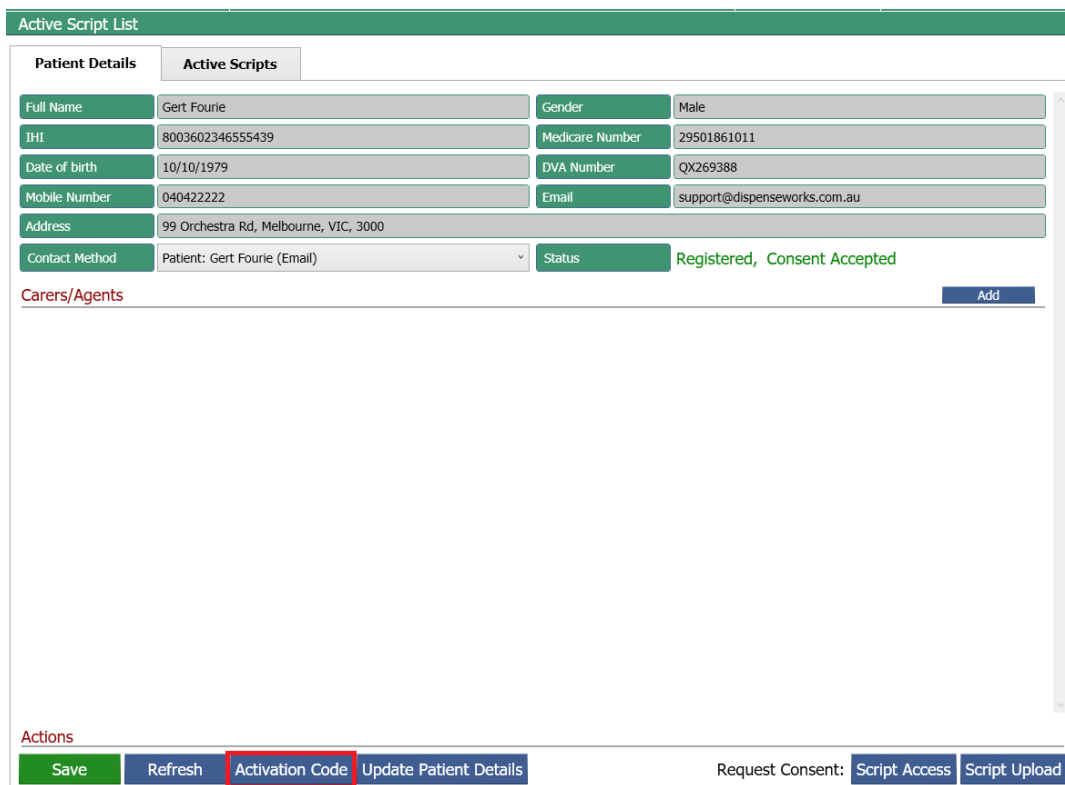

To register a patient's mobile application with MySQL the user must complete the following.

1. Click the MySQL Tile to enter a patient's MySQL profile from either the Dispensing Screen or Patient Maintenance

The screenshot shows the 'Dispense Works' application interface. At the top, there's a header with 'Dispense Works' and various navigation icons. Below that, a patient profile for 'Gert Fourie' is displayed, including DOB (10/10/1979), Age (44 yrs 6 mths), and IHI Status (Active / Verified). The 'Medication History' section is open, showing a list of medications with columns for Date, Medication, Directions, Supply, Price, and Prescriber. On the right-hand side, there's a vertical menu of icons for various functions. The 'MySQL' icon, which is a red square with white text, is highlighted with a red box.

2. Press the 'Activation Code' button.

The screenshot shows the 'Active Script List' window. The 'Patient Details' tab is selected, displaying the following information:

Full Name	Gert Fourie	Gender	Male
IHI	8003602346555439	Medicare Number	29501861011
Date of birth	10/10/1979	DVA Number	QX269388
Mobile Number	040422222	Email	support@dispenseworks.com.au
Address	99 Orchestra Rd, Melbourne, VIC, 3000		
Contact Method	Patient: Gert Fourie (Email)		Status
			Registered, Consent Accepted

Below the patient details, there is a section for 'Carers/Agents' with an 'Add' button. At the bottom of the window, there is an 'Actions' bar with several buttons: 'Save', 'Refresh', 'Activation Code' (highlighted with a red box), 'Update Patient Details', 'Request Consent', 'Script Access', and 'Script Upload'.

3. The following pop up will appear for the user to provide to the patient.
